Royal Truck & Utility Trailer

UNLOCK MAJOR TAX SAVINGS ON TRAILERS WITH SECTION 179 IN 2025

Did you know your trailer purchase in 2025 could qualify for a major tax deduction? Thanks to recent updates to Section 179 of the IRS Tax Code, businesses like yours can deduct the full purchase price of qualifying trailers and keep more money in your pocket.

HERE'S WHAT YOU NEED TO KNOW:

- Bigger Deduction Limits: For 2025, businesses can expense up to $2,500,000 in qualifying equipment purchases.
- Phase-Out Threshold: The deduction begins to reduce once your total qualifying purchases exceed $4,000,000.
- Applies to Trailers: Both new and used trailers qualify, as long as they are purchased and put into service during the tax year.
- Business Use Requirement: Trailers must be used for business purposes more than 50% of the time.
- Bonus Depreciation: Boost cash flow with immediate write-offs and 100% bonus depreciation on assets placed in service after January 19, 2025.

QUICK EXAMPLE:

If a trailer is purchased for $150,000 in 2025 and put it into service, the business may be able to deduct the entire cost in the same year, reducing its taxable income significantly.

WHY IT MATTERS FOR YOU:

This update is one of the most effective ways for businesses to invest in equipment and see immediate tax benefits. It makes 2025 an excellent year to refresh or expand your trailer fleet.
